

Hydrocyclone APEX Replacement Kits for Mineral Processing

Choose the GIW® APEX Kit to reduce rebuild time

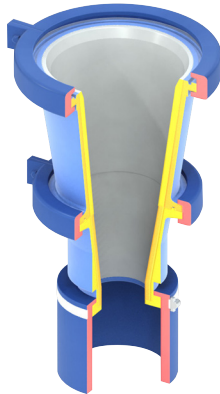

APEX Replacement Solutions

The apex is the highest wear part of the cyclone. This section is subjected to a high concentration of coarse solids travelling at a high velocity. The GIW line of hydrocyclones features a patented long wearing design that can allow a GIW replacement apex to be fitted to your existing equipment. In addition, rebuild time is reduced from hours to minutes with GIW replacement solutions.

Typical Applications

Replace high wear lower cones & apexes with durable, long life GIW urethane/ceramic apex kits for:

- Primary ball mill cyclones
- Aggregate cyclones
- Tailings cyclones
- Regrind cyclones
- Coal preparation cyclones
- Dewatering cyclones
- Phosphate/potash cyclones

Easy to install and maintain

- GIW replacement parts use 1 clamp with 2 bolts instead of competitor's 4-10 nuts, bolts & washers.
- No liners, glue, or gaskets are needed with GIW replacement parts.
- Patented GIW urethane/ceramic replacement parts are lighter weight than lined steel housings - lower possibility of service personnel injury.
- GIW replacement parts can be installed on any existing cyclone without modifications.

Durable

- Patented GIW urethane encapsulated ceramic is abrasion and impact/cracking resistant.
- Even if cracked by tramp material, the ceramic liner stays together and can achieve full wear due to its bonded urethane backing.

Best value

- Parts are constructed with a premium reaction bonded silicon carbide (RBSiC) ceramic and urethane.
- GIW replacement parts cost 25-50% less than a standard ceramic apex.
- GIW RBSiC resists wear better than aluminum oxide or nitride bonded silicon carbide ceramics sold by other cyclone vendors.

Apex Catalog

Apex and lower cone to fit	Min apex diameter (in.)	Max apex diameter (in.)
GIW replacement parts for Krebs® D15B, D15LB	1.5	3
GIW replacement parts for Krebs® D26B, D26LB	4	6.75
GIW replacement parts for Krebs® gMAX®26	4.75	6.75
GIW replacement parts for Krebs® D33B	5	10
GIW replacement parts for Krebs® gMAX®33	7	8.5
GIW replacement parts for Technequip™ H15	1.5	3.75
GIW replacement parts for Technequip™ H26	4	6.75
