

**Our ceramics provide excellent wear life.**

See inside panel for one of our customers testimonial.

**Some of Our completed Cyclones**

FlowQuip is an excellent alternate source for custom silicon carbide components used in high performance applications.

We carry the following Silicon Carbides:

- Nitride Bonded
- Reaction Bonded
- Direct Sintered

# A letter from one of our Copper Mine customers.

During the past 18 months, the utilization of the FlowQuip team to install ceramic liners in our GMax Cyclones was very successful. In many cases, wear life was doubled. Their epoxy method held the ceramic components in place when they would crack, which previously, would have caused them to fail. FlowQuip's custom designed ceramic liners, which cover the two lower portions of the cyclone, helped to eliminate wear at the mid junction point. This resulted in extended performance at lower overall cost.

Their support is greatly appreciated. In many ways, their product has actually eliminated the demand for the product because they are lasting so long, which is a good thing for us. I look forward to continually working with you as we continue to look for ways to improve our cyclone durability and performance.

Respectfully,  
George N Christensen III "Chris"

FlowQuip is an excellent alternate source for custom silicon carbide components used in high performance applications.

We carry Nitride bonded, Reaction Bonded, and Direct Sintered Silicon Carbides.  
practice areas

- Flowquip uses an epoxy system designed to hold the ceramics in place even if a large object goes through the cyclone and cracks the liners. (Opposed to the factories using a silicone caulking, which doesn't hold up.)
- Whether you are looking for liners, partial rebuilds or full rebuilds, we can help!
- Our rebuild shop will have your cyclone rebuilt to factory specs, in a timely and cost effective manner, and returned to you looking like new! (See Picture)
- We take pride in our work, and never take short cuts. Give us a call and let us help you save time and money with your liners and cyclone rebuilds. 801-953-1748. We look forward to hearing from you.

Original size liners available in most sizes.

Our custom one piece Lower Cone and Apex Liner has proven to be very successful.

Middle Cone Liner
