MG Series

SUBMERSIBLE GRINDER PUMPS

The **MG SERIES GRINDER** Tsurumi submersible pump is designed for handling raw sewage, heavy duty industrial and food processing applications, where the pump is required to operate continuously while grinding oversized material and still the customer maximum reliability. The **MG SERIES GRINDER** has a proven track record for offering long life in both continuous and intermittent sump applications, such as; hotels, prisons, commercial buildings, restaurants & retail applications where down time is unacceptable. With the unique High Chrome grinder impeller and shredder plate design in the **MG SERIES GRINDER**, Tsurumi has the right model to handle every application to efficiently transfer the most aggressive solid laden liquids, in the pump market. Available in 2, 3 & 5HP in Free-standing & Guide Rail designs.

The Pump Technology That The World Trusts.

Tsurumi introduced its international strategy in the 1960s. Our technical capabilities gained recognition first in Asia in the 1970s and then in the United States and Europe in the 1980s.

Following the initial steps, our international division successfully penetrated many worldwide markets including: construction, civil engineering, mining, industrial, wastewater, sewage treatment, and flood control.

Today Tsurumi has expanded its base of operations and is active in 45 countries and regions. In addition to supporting a variety of work sites, our high-performance pump products are widely used in large-scale national projects where they surpass expectations. Reliable performance is our first priority.
